

## Product Information

Global motorcycle theft statistics show motorcycles secured by obvious security devices actively dissuade thieves. Grip-Lock is the most visible motorcycle lock available.

# ABOUT GRIP-LOCK SECURITY

Grip-Lock Security is the company that invented the motorcycle throttle security lock market. The Grip-Lock was first designed and made in New Zealand, in 1996 and after winning a New Zealand government industry award in 1998 is now secured by patents registered around the world.

With now over a decade of experience in the motorcycle security industry, Grip-Lock provides the only patented throttle Grip-Lock in the world. Leveraging its innovative design features and unique characteristics, the brightly coloured Grip-Lock acknowledges the vital role, visibility plays in effective motorcycle security.

The company is 100% New Zealand owned by business leaders who are passionate about individuality and have a proven talent for providing simple solutions to complex problems.

# our product

Grip-Lock is Kiwi ingenuity - a world first. Providing the worlds only motorcycle security device that clamps both the throttle and hand brake instantly - meaning no twist grip - no acceleration!

## Features

- Highly visible

---

- Anti drill, anti pick lock barrel with 50,000 key combinations.

---

- Compact (fits easily in pocket, bag or glove compartment)

---

- Simple, quick and easy to use (if security is easy you'll use it every time)

---

- Laboratory developed and tested to resist extreme impact levels.

---

- Strong yet lightweight.

---

- Unforgettable (eliminates embarrassing falls and unnessary damage to your vehicle)

---

- Highly adjustable (immobilises the throttle with or without pressure on the brake)

---

**Colours** Grip-locks are currently available in - Red, Black, Yellow, blue, orange and Green.

## Accessories / Fit Guide

Each Grip-Lock comes with 2 flat blade laser cut keys plus 3 rubber grip inserts for maximum adjustability and perfect fit.

Grip-Lock fits 96% of all models of motorcycle. It will fit any 27-38mm diameter twist grip with or without the three rubber inserts in a combination. Grip-Lock fits ALL models of Vespa.

Raised mounting platform: Protected by raised ring border to prohibit forcible removal

Labelling: High quality poly-carbonate identification panels to survive extreme weather

# our customers

We have been overwhelmed by Grip-Lock customers who have taken the time to write to us about what they think of their Grip-Locks.

This feedback reflects the passion we all feel for our bikes and how infuriated we are at the threat of theft.

Here are some of the testimonials we have received.

'I really love my Grip-Lock. Its so easy to use. Quick to install and firmly locked. I don't need any heavy chainlocks that are difficult to use'

Ronny | Belgium

'I think you've got a brilliant product and it would be great to have something practical, small and light as I rarely, if ever carry my heavy disc-lock with me'

Mark - Honda VFR 800i | United Kingdom

'What a fantastic idea. I'm finally locking my bike every single time I use it as its now so quick and easy. Thanks for the great service too. I'm telling my whole club'

Jacob Vespa 250 | California, United States of America

## Testimonials

..what a fantastic device it is. Nothing but good things to say about it.

a.) I never need to bend down again as I always had to with traditional locks or chains placed through the wheels.

b.) I never get dirty hands by fiddling with U-locks through dirty front and rear wheels

c.) It takes a few days to get used to the lock mechanism but once you have this down it is very easy to use - well designed

d.) It has a nice solid feel to it when it is locked in place

e.) Reasonably priced

f.) Most importantly I never have to worry about pulling away with a lock still on my wheel Keep up the good work.

Miles | London, United Kingdom

'.. it's a great product and fits and works perfectly! I've been looking for a simple but effective and portable security solution for a long time, but a 1966 Lambretta doesn't seem to be compatible with the majority of locks on the market at the moment! Many thanks for the fast delivery'

Andy - 1966 Lambretta rider Manchester | United Kingdom

'I think its a brilliant idea , myself and two friends have gone to ride off after forgetting our disc locks , two of us smashing the mudguards !'

Jeff - Vespa px150 | United Kingdom

'It came in today and man it is a beauty. So much more convenient than a disc brake lock. Quicker to secure too. Thanks a million'

Roland - PGO Metro 125cc | Barrigada, Guam

'Such an awesome find. I have a grip-lock for each of my 3 vespas. They look hot and my hands are clean'

Jade | London, United Kingdom
